

Lifting the restriction of sales promotion for the products related to FTS

In follows to the last announcement of November 8th, 2023, we have lifted the restriction of sales promotion for all product series related to FTS (Fuji Electric Tsugaru Semiconductor Co., Ltd.) excepting an item which has not been recommended for the new design projects because we have a prospect of starting mass production at the transfer destination and we have been able to secure more supply volume than we expected.

1. Product series: "Products on the List of Lifted Sales Expansion Restrictions" listed below.
2. Products on the list can be promoted regardless of the mass production schedule of the project.
3. In the case of a project of 100kpcs/month or more, please kindly confirm with Torex Japan whether the project can be supported.
